Experience

N/A (Freelance) Ypsilanti, MI

Freelance IT Support Technician May 2025 – Present

- Provide technical assistance to users experiencing hardware, software, and operating system issues.
- Install, configure, update, and troubleshoot software applications and operating systems.
- Set up and configure computers, workstations, user accounts, peripherals, and other IT equipment.
- Assist users with password resets, account access, system configuration, and basic security-related concerns.
- Diagnose and troubleshoot network connectivity issues involving Wi-Fi, Ethernet, printers, and basic router configurations.
- Communicate technical issues and recommended solutions to users in a clear and professional manner.

Sunset Computers Ypsilanti, MI

Supervisor Dec 2023 – Aug 2025

- Independently managed daily operations of a computer repair business, overseeing technical repairs, customer service, sales, inventory, and administrative responsibilities.
- Diagnosed and resolved hardware and software problems across desktop and laptop computer systems.
- Installed, upgraded, and replaced computer components, including RAM, storage drives, power supplies, and other hardware.
- Installed, configured, and troubleshot Windows and macOS operating systems, applications, drivers, and peripheral devices.
- Performed data transfers, system backups, software installations, and routine computer maintenance while prioritizing customer data security.
- Worked directly with customers to identify technical problems, explain repair options, and recommend appropriate solutions.
- Managed multiple repair requests and business responsibilities while maintaining organization and customer satisfaction.

Projects

Windows Active Directory & Domain Controller Jul 2026 – Present

- Configured and worked with Windows Server Domain Controller environments and Active Directory.
- Created, deleted, and managed Organizational Units (OUs) to organize users and computers within a domain environment.
- Created and managed Active Directory user accounts and computer accounts.
- Practiced centralized user and computer administration within a Windows domain.
- Worked with DNS and DHCP services to understand domain name resolution and automatic network configuration.
- Configured and managed domain-connected computers and practiced server administration fundamentals.
- Developed practical familiarity with enterprise-style Windows infrastructure and centralized identity management.

IT Help Desk & Trouble Ticket Simulation

- Practiced creating, opening, categorizing, prioritizing, updating, and closing support tickets.
- Gained hands-on familiarity with Jira, Spiceworks, and FyneDesk ticketing platforms.
- Simulated customer support interactions through chat-based scenarios.
- Practiced organizing support requests and managing ticket statuses throughout the ticket lifecycle.
- Focused on accurate ticket categorization, prioritization, and documentation.
